

Cycle Lanes or Bike ways 5

Cycle lanes or bike ways are progressing very well throughout Dublin and eventually all of Dublin will be linked with a desired cycle lane network. A major cycle way is required through the city centre to complete the cycle network. O3 can provide a two-way cycle lane from O Connell Bridge to Heuston via Dame St. or Fleet St. and use wide Cook St. to link up the overall cycleway network. This cycle network can use the Quays if Quay Bus Contra-flow is installed. This allows scarce road space to be used fairly for all road users, for suitable bus interchanging vital for users with a disability which there are many, ignored in most plans.
